## SUMMARY

Experienced Software Engineer specializing in front-end development. Skilled in creating high-quality solutions tailored to client requirements, with a strong commitment to staying updated on industry trends and emerging technologies.

## EXPERIENCE

### Rave Tech Pte. Ltd.

Front-end Engineer

*(Singapore, Singapore) Remote*

*Nov 2024 – Present*

- Leveraged Sanity CMS to streamline content management for travel agency websites, enabling clients to easily update destination details, travel packages, and promotional content.
- Collaborated with UI/UX designers to create visually compelling user interfaces.
- Developed reusable React components to maintain code consistency and scalability across projects.
- Assisted in the implementation of accessibility best practices to ensure compliance with WCAG standards.
- Monitored and resolved performance bottlenecks using tools like Lighthouse and Chrome DevTools.
- Introduced Tailwind CSS to streamline styling processes, reducing development time significantly.

### PT Nutech Integrasi

Front-end Engineer

*(Jakarta, Indonesia) On-site*

*Aug 2023 – Nov 2024*

- Developed CEISA 4.0, a web app for the Indonesian Directorate General of Customs and Excise, impacting 5000+ users.
- Created 25+ document formats and implemented PDF/XLSX rendering using React-pdf, jsPDF, and ExcelJS.
- Ensured app quality through comprehensive unit, integration, and end-to-end testing.
- Built responsive user interfaces with Ant Design and collaborated with UI/UX designers for intuitive designs.
- Worked with cross-functional teams and maintained communication with system analysts.
- Provided ongoing maintenance and support using Git and Jira to manage enhancements and bug fixes.

### faoTech

Full-stack Engineer

*(Kazan, Russia) Remote*

*Sep 2022 – Aug 2023*

- Led a front-end team of 2-3 engineers across 3 projects, building fully responsive web apps.
- Collaborated with UI/UX designers to develop visually appealing user interfaces and integrated internationalization support with i18next.
- Optimized API endpoints and ensured efficient CRUD operations while managing server-side logic and database development.
- Implemented key authorization features like login, registration, and account recovery.
- Maintained detailed documentation and provided ongoing maintenance and support for applications.
